 **Location:** Goldcast Magic Link

 **Time:** [11:00 AM – 12:00 PM PST](#)

Event Overview

GitHub Copilot supports plenty of ways to make your experience feel personal, from instructions and custom agents to prompts and skills. But when does each tool make sense, and how do they work together? In this session, we'll break it down with practical demos and advice, so you can tailor Copilot to your standards, architecture, and team practices with less guesswork, and more flow.

We look forward to seeing you there 🚀

Best,

The GitHub Team
